

The global on- & offshore expo

2016

Wind Cluster at Hamburg WindEnergy

This year's Hamburg WindEnergy was a great success to Wind Cluster. More than 30.000 visitors at the fair indicated that the industry is still very active indeed.

Wind Cluster participated together with Jaquet at the Hamburg WindEnergy with a 18 m2 stand located in Hall B6 together with a great number of the major players in the global wind industry.

Design and position of our exhibition stand attracted a lot of old friends and visitors passing by.

It provided an excellent frame for presentation of the high-quality products of our partners in the shape of videos, brochures and presentation materials.

Also, the fact that the visitors could actually see and feel the products was important. A good starting point for a discussion.

The Hamburg Wind Energy proved a splendid venue for networking, and the visitors at the Wind Cluster stand counted scores of nationalities, businesses and interests. A true picture of the ever expanding wind industry far beyond the difficult years around 2010.

Several new products and partners were featured at Wind Cluster's stand. Also, the offer to supply complete pitch systems was drawing attention from passers-by.
