

Wind Cluster in French Quarters

This year's EWEC was a great success to Wind Cluster, and the more than 7,500 visitors at the fair indicated that the industry is still very active indeed.

Wind Cluster participated at the EWEC with a 25 m² stand located in Hall 2 together with a great number of the major players in the global wind industry.

Design and position of our exhibition stand attracted a lot of old friends and visitors passing by. It provided an excellent frame for presentation of the high-quality products of our partners in the shape of videos and PowerPoints, and the fact that the visitors could actually see and feel the products was important, a good starting point for a discussion.

The EWEC proved a splendid venue for networking, and the visitors at the Wind Cluster stand counted scores of nationalities, businesses and interests, a true picture of the ever expanding wind industry.

Several new products were featured at Wind Cluster's stand. The new offer to supply complete pitch systems was one of the novelties drawing attention from passers-by.
